Update on the situation in Laval Information on the COVID-19 temporary residential centre

Laval, April 25, 2020 – The Centre intégré de santé et de services sociaux (CISSS) de Laval would like to inform the public that a temporary residential centre will be opening its doors at 3550 Lévesque Boulevard West in Laval. The centre will house users from residential facilities in the region who have tested positive for COVID-19.

After testing positive for coronavirus, residents who need to recover and isolate themselves cannot do so safely in their regular residence, since this generates a significant risk of spreading the virus to other users. These patients, who are not elderly, will not require any specific care. If their condition deteriorates and additional care becomes necessary, they will be transferred to the Hôpital de la Cité-de-la-Santé.

The centre has a maximum capacity of 21 users.

Visits are banned

In accordance with government directives, all visits to this facility are banned and those who live there must isolate themselves and avoid non-essential outings.

The CISSS de Laval would like to thank the public for its valuable cooperation. Please note that for reasons of privacy, no information about the identity of those affected will be released.
